- Whole House Distributed HDTV: The various ways to distribute analog, standard definition television around the home are well established. However few, if any of these can be extended to distributing HDTV (High-Definition Television) around the home. In this article we present one way of doing just that. And all without having to run expensive, dedicated component video, digital audio and/or HDMI (High-Definition Multimedia Interface) cables to every room. (June/July 2008) IBM developerWorks
