

## Can I run CleanUp! from the command line?

It is possible to run CleanUp! from the command line. To see a list of the available options, type: `cleanup -help`

For example, `cleanup -AutoRun`

will runs CleanUp! quietly in the background. Note that when run this way CleanUp! will use the options previously selected, so be sure those are set as required before using this option.

Note: Unless the CleanUp! installation directory is specified in your %PATH% then you will need to specify the full path to the cleanup.exe program.
