

## Top 10 disk space recoveries

The following are some of the best results using CleanUp! to free disk space that users have reported. If you recovered more than 1.2 GB then let me know (see [Take the CleanUp! Challenge](#) for details).

One user recently reported freeing up 12.6 GigaBytes of disk space on a 16.6 GB hard drive. Unfortunately, he wasn't able to send me the log file, so does not get included in this top 10 list.

You might also be interested in looking at the top 10 file recoveries to see the number of files CleanUp! was able to delete from some users machines.
