

Record Recoveries

The following pages list some of the best results reported by users using CleanUp! to delete files and free disk space. Notice that the top recoveries exceed a million files - that's a lot of junk that Windows and Windows programs leave behind - and 50 GB of disk space. That's why you need something like CleanUp!

If you have managed to recover more than 250,000 files or 25 GB using CleanUp! then let me know (see [Take the CleanUp! Challenge](#) for details).
