

Features and benefits

See what information Windows saves about you. Index Dat Spy exposes information "hidden" in index.dat files on your computer. This information includes URLs of web sites that you've visited, even though you may have cleared your history. If there are multiple users that log onto your machine, it also exposes which user visited each site. This can be useful for checking on what Web sites your kids have been visiting and when.

Runs on 32-bit Windows. The same version of Index Dat Spy runs on Windows 95, Windows 98, Windows ME, and all editions of Windows NT 4.0, Windows 2000, Windows XP and Windows Vista.

Free. That's right, you can keep on using this program and it won't expire. You are offered the chance to register Index Dat Spy and pay a price you think it is worth. Think of this payment as a tip - so please contribute something. This payment will help with the continued development of Index Dat Spy and allow me to make a living. This payment can be as low as \$5 or as high as you wish. If you find Index Dat Spy useful and continue to use it, please register .

Small. The entire Index Dat Spy utility is so small, you can carry it around on a 3.5" floppy disk.

Simplicity. A clean, simple interface - designed for novices, yet providing all the information more advanced users may be interested in.

Privacy information. There is no spy-ware contained in this program. We do not monitor your actions or e-mail. When you register this program, we will not give your e-mail address or personal details to anyone.

This program is so simple to use, you'll be spying on your index.dat files and protecting your privacy all in a matter of minutes!

You can download Index Dat Spy from this site (approx. 300 kb in size).

So download Index Dat Spy now and start monitoring what information Windows is storing about your Internet activities.
